

APPENDIX 1

WORLD-RECORD ATTEMPT FOR SECURED FOOTLOCK

The following criteria must be met in order for a chapter or other group to sponsor a Secured Footlock event for the purposes of setting a new world record.

1. A current member of an ITCC Committee (Rules, Operations, Technical, ETCC/NATCC/APTCC) serves as an independent judge.
2. The chapter or associate organization undertaking the attempt must arrange for an appropriate ITCC committee member to be present and pay all associated costs. (2012)
3. All equipment used by the climbers and officials must satisfy the requirements listed in the current ITCC rules and regulations.
4. The rules for the Secured Footlock event (ITCC rules 7.1 - 7.5.4) must be followed.
5. When electronic timing is used, an additional three manual timings by stopwatch must be taken as a backup in case of failure of the electronic timing device. If the electronic device fails, the three manual times will be added together and an average time recorded. The three manual times recorded must have no more than 50/100ths of a second difference between the fastest and slowest time to qualify for recording. If times fall outside this range, no world record time can be recorded. (2012)
6. When only manual timing is used, five stopwatches must be used, and the highest and lowest times are discarded. The three remaining times will be added together and an average time recorded. The three manual times recorded must have no more than 50/100ths of a second difference between the fastest and slowest time to qualify for recording. If times fall outside this range, no world record time can be recorded. (2012)
7. A world record time will not be considered official until the request for validation form (attached) has been completed, returned to the ITCC staff liaison at ISA headquarters, and signed by the ITCC Committee Chair. (2012)
